Results Targets Leaving Cert 2012/13

Student Name: _____

Write down what you want to achieve in each subject for each term. Make sure that the target you set yourself is achievable. Be realistic, take into account your abilities and past performance. Don't select a result that you don't believe you will reach. At the same time your goals for each subject should reflect your potential. Your targets should be grades you would be proud to achieve.

When you get your results back from your teachers, write your scores under the **Actual** column for that term. For now work only on setting your target results for your next exams. When that terms is finished, reset your goals for each subject by filling out the targets for the next term. When you get your results, write them into the Actual column for that term, and so on. You may need to adjust your targets as you go in the light of your most recent 'results'.

If you go to work on your goals, your goals will go to work on you. If you go to work on your plan, your plan will go to work on you. Whatever good things we build end up building us.
